

## COVID-19 SAFETY PLAN

### Safety Plan

We are doing what we can to limit the spread of COVID-19 by following the core infection control practices.

1. Hand Hygiene and respiratory hygiene (e.g., covering your mouth while coughing).
2. Postponing visits if the visitor does not feel good. If a visitor has known close contact within the last ten days, they must postpone visits for ten days.
3. Individuals are encouraged to remain current with all recommended COVID-19 vaccine doses.

Individuals admitted to the North Dakota Veterans Home will be tested for COVID-19 three times over the first five days of admission.

Visitors will sign in at the kiosk at the main entrance of the building.
